

Junxure® Integration for Laserfiche®

Cities Digital's Junxure® Integration is used to link client records from Junxure® to Laserfiche® client folders. This Integration is complete with a Documents tab in Junxure® showing all corresponding client documents from Laserfiche®.

The Junxure® Integration contains a robust set of features for document synchronization with Laserfiche®:

- Includes the ability to view all documents stored in Laserfiche® in the documents tab within Junxure®.
- Store documents in customized folder structure in Laserfiche®.
- Provides automatic importation of all documents stored on the "P:\\" drive.
- Allows scanning directly from Junxure®
- Includes barcode creation via Dymo® label printers to automatically file and index documents.
- Automatically apply indexing information to new documents when scanning or importing documents.
- Simplified search interface for finding relevant documents from Junxure®.
- Drag and drop documents into Junxure® and have them automatically stored in Laserfiche®
