

Virus Scan Integration For Laserfiche® Forms

ABOUT

CDI's Virus Scan Integration for Laserfiche Forms is a backend integration offering organizations the ability to proactively scan the incoming files being uploaded to your Laserfiche Forms.

The Virus Scan Integration for Laserfiche Forms is an important and useful tool for any organization using Laserfiche Forms, especially for organizations that make their Forms available to the public. This virus scanning software prevents potential threats from being uploaded and helps to maintain the security of your Laserfiche Repository.

Receive email notifications when a potential virus threat is detected.

elcar.pdf: A potentially unsafe file has been detected.

Please wait while your upload is processed

Submit

Detect viruses in files uploaded to Laserfiche Forms.

FEATURES

Features of the CDI Virus Scan Integration for Laserfiche Forms include:

Automated File Scanning

Automatic virus scanning of all files uploaded to a Laserfiche Form.

Email Notifications

Email notifications sent to the designated system administrator(s), making them aware of any potential threats, including valuable information about the threat.

Configure and Go

No user interaction is required with the integration after the initial configuration.

ESET Virus Scanning Software Supported

Supports all versions of the ESET Virus Scanning Software - scanning Laserfiche Form upload fields behind-the-scenes.
