OUR TAKE

The Canon imageFORMULA DR-S250N is an excellent choice for individuals, remote workers, hot desking, and small businesses that want to digitize and automate workflows. The device supports time-saving capabilities through an intuitive and straightforward user experience, aided by an easy-to-read OLED display for improved usability. Help and support is also excellent, with illustrations and instructions available onscreen when an error occurs. The device sports a compact design, and despite the higher-than-average initial purchase price, the device represents a very good value proposition given the functionality on offer. Easy to set up, ideally suited for space-conscious workers, and highly reliable, the Canon imageFORMULA DR-S250N will adapt to hybrid working environments. One-to-one connection via a USB interface, or via scanning a QR code from a smart device will provide even greater flexibility for users, and compatibility with CaptureOnTouch Lite Web enables operation with any browser-enabled smart device. The software also enables scanned pages to open in a browser, creating flexible usage in diverse working environments. Given the Canon imageFORMULA DR-S250N's simple user experience, compact design, excellent productivity, and strong scan client, Keypoint Intelligence highly recommends the Canon imageFORMULA DR-S250N for any individual, hybrid worker, hot desker, or small business that wants to extend automation to the data entry phase.

Advantages	Limitations
Excellent single-page and multi-page productivity scores for both hardware and software	Media Handling impacted by specific document types, such as creases, foldlines, carbon paper, curb, coated surfaces, tears, chips, staples, and extremely thin documents such as semi-transparent thin paper
Impressive bundled software provides excellent document workflow management and device capabilities	Specific user profiles would be a useful feature
One-to-one connection via USB interface, or through QR Code scanning from a smart device	
Up to 99 single-touch scanning profiles available	
Supports scanner network auto configuration
