

# Cityworks® Integration for Laserfiche®

## ABOUT

Cityworks is the leading GIS-centric solution for public asset management. CDI's Cityworks integration for Laserfiche allows users to conveniently retrieve case study details and attachments from Cityworks. The software is backed by the power of Esri® ArcGIS®, which allows users to take advantage of the CDI ArcGIS integration for additional functionality within the two software applications.

## FEATURES

- Extract case ID or attachment ID from a webhook, each are updated in Cityworks.
- Retrieve case metadata based on the case ID retrieved from a webhook.
- Retrieve attachments associated with the provided case ID.
- Download a case attachment and make it available to other Laserfiche workflow activities.
- You can utilize the CDI ArcGIS integration to add additional functionality within ArcGIS and Cityworks
- Lookup information from Data Groups associated in Permits Licensing & Land cases
- Lookup address and parcel numbers from Permits Licensing & Land cases
